SOFTWARE DEVELOPER

EXPERIENCE

Software Developer

Wiredin Ltd — March 2025 to Now | Onsite

- Currently working on the Murakoze App, a platform designed to improve user engagement and service experience across both mobile and web applications.
- Focusing on integrating Artificial Intelligence into the platform to enhance its capabilities and provide more intelligent, data-driven solutions that improve the overall user experience.
- Collaborate closely with designers to translate UI/UX concepts into functional, high-quality code, and work alongside senior developers to implement scalable, maintainable solutions.

Software Engineer

Cowlytics — July 2025 to Now | Remote

- Worked on the Cowlytics platform, building features that allow farmers to view each cow's medical history (treatments, vaccinations and health records) and link every cow to its farm location for accurate tracking.
- Collaborated with cross-functional teams to ensure that each cow is correctly linked to its registered farm and historical records, enabling reliable traceability, easier audits, and improved herd management.
- Participated in code reviews and maintained high code quality standards throughout the development lifecycle.

Front-End Developer

KLAB Techup Skills — June 2023 to January 2024 | Onsite

- Worked on a smart car parking system with both web and mobile applications, for managing space availability and reservations.
- Collaborated with backend teams to integrate RESTful APIs for live parking availability updates and payment processing.

- Coordinated with design and backend teams to ensure seamless user experience across both platforms.

Intern Web Developer

TRUST Engineering Ltd — April 2022 to September 2022 | Onsite

- Developed and maintained responsive web applications using Next.js, TypeScript, and JavaScript, focusing on usability, performance, and accessibility across different devices and screen sizes.
 - Gained practical experience with networking concepts and web technologies, applying this knowledge to support reliable web performance, connectivity, and user accessibility.
 - Collaborated on web development tasks while strengthening skills in frontend development, troubleshooting, and delivering functional, user-focused web solutions.
-

EDUCATION

Bachelor of Software Engineering

UNILAK Kigali — October 2019 to March 2023

- Developed more than seven software projects in both academic and practical contexts, gaining hands-on experience in software development, problem-solving, and project implementation.
- Collaborated on group projects that strengthened teamwork, communication, technical documentation, and collaborative software development skills.
- Gained practical experience applying software engineering principles to real-world challenges while developing a strong foundation in programming, system development, and technical problem-solving.

MEAN Stack Developer — Training

Alison — March 2023 to August 2023 | Remote

- Completed an online MEAN Stack Developer course, strengthening full-stack development skills and gaining practical knowledge of MongoDB, Express.js, Next.js, and Node.js.
- Gained hands-on learning experience in developing web applications, integrating frontend and backend technologies, managing databases, and applying full-stack development principles to practical projects.

SKILLS

Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, TypeScript, Redux

Backend: Node.js, Express.js

Database: MongoDB, MySQL, PostgreSQL, Supabase

AI: Generative AI, AI Integration, LLM APIs, RAG, NLP, Ollama, AI-Powered Applications

Tools: Git, GitHub, Postman, Heroku, Docker, Figma, GitLab

Other: REST APIs, Responsive/Mobile Development, Agile, CI/CD

Soft Skills: Teamwork, Communication, Remote Pair Programming, Leadership

LANGUAGES

English: Professional Fluency

French: Professional Fluency
